# Clinical AI is hard.
Signal 1 makes it easy.

Our best-in-class platform enables hospitals to deploy and scale AI solutions across their enterprise.

With built-in testing and monitoring capabilities, the platform makes it easy to responsibly integrate AI into clinical routines, including models developed by a hospital's own researchers.

Platform Features

Seamless integration

Eliminate manual work for staff and prevent duplicative integrations.

Rapid testing

Silently test multiple models to evaluate impact before solutions are turned on.

Easy Customization

Customize model output and display options with our configurable rules engine.

Robust governance

Build AI governance with our model validation reports and 24/7 monitoring.

Enabling researchers

Deploy models built by your researchers using our platform's model hosting capabilities.

Best-in-class security

Feel confident knowing our platform meets leading standards for privacy, security and quality.

About Us

Founded in April 2022, Signal 1's platform is in use at **five hospitals in Canada,** delivering AI predictions to clinical staff and monitoring over **1,000+ patient beds daily.**
